📅 Jun'17 to Jul'17

Intro to OOPs, Loops, Arrays, Strings, Classes, Object, Inheritance, Constructor and Destructor, File Streams, Structure and Union, Data Structure, etc.

PROJECTS

Android App using Kotlin **in-progress ➦**   **Personal Project**

An Android App to fetch latest news from various sources using newsAPI using Kotlin. Categorised the News like Technology, Top Headlines, etc. I used RecycerView and GridLayouts to present the data from JSONArray.
Tools - Android Studio, API, Adapter, Kotlin, Ubuntu.

3-Tier Web App on AWS Cloud ➦   **Personal Project**

A 3-Tier (Presentation, Application, Database) Web App is deployed on the AWS Cloud with services like EC2, RDS, API Gateway, Lambda Function, S3, etc along with end-to-end encryption.
Tools - Amazon Web Services, Node.js, API, Lambda, Certificate Manager, S3.

Web based Personal Portfolio ➦   **Personal Project**

During lockdown i was free so learned about CSS, Bootstrap and basics of JavaScript and then developed fully-responsive Personal-Portfolio then deployed it publicly using AWS.
Tools - VS-Code, JavaScript, CSS, Bootstrap, XAMPP, HTML..

Peering Multi-Region Data Center on AWS Cloud Infrastructure ➦   **Minor Project**

Cultivated a Project to take leverage of various types of Amazon Web Services like EC2, VPC, RDS, Auto-Scaling, IAM, S3, VPC Peering, Multi-Region, Multi-AZ etc, and how we can use them wisely.
Tools - Amazon Web Services, Linux-OS(CentOS7, Ubuntu), EFS, RDS, Disk-Mount.

HOBBIES

- Bhangra
- Folk Instruments
- Playing Volleyball
